SUMMARY

Full-stack software engineer (B.Tech CSE, 2024) building production SaaS with TypeScript, React/Next.js, Node.js and PostgreSQL. Owns features end to end: requirements, API and schema design, secure multi-tenant data access, automated testing, CI/CD and deployment. 50+ builds shipped for client companies and remote teams, including a live EMI/payment platform, a multi-tenant ERP, a cross-platform (web, Windows, Android) task app and LLM work (QLoRA fine-tuning, FastAPI model serving).

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL, Python, C#
Frontend	React, Next.js (App Router, Server Components), Tailwind CSS, Zustand, React Hook Form, Electron, Capacitor
Backend & APIs	Node.js, Next.js Route Handlers, RESTful API design, Zod schema validation, FastAPI, ASP.NET Core MVC
Databases	PostgreSQL (data modelling, Row-Level Security, migrations, triggers, indexing), Prisma ORM, Redis
Cloud & DevOps	Docker, Kubernetes, GitHub Actions CI/CD, Vercel, AWS S3, Linux, Git
AI / LLM	LLM fine-tuning (QLoRA), model serving with FastAPI, retrieval-augmented generation (RAG) design, prompt engineering
Security & Testing	Multi-tenant isolation, RBAC, OAuth 2.0 (Google), bcrypt; Vitest unit/security tests, Playwright end-to-end tests
Engineering	System design, requirements analysis, debugging & root-cause analysis, technical documentation

EXPERIENCE

Full-Stack Software Engineer — Freelance & Contract 2024 – Present
Client companies, startups and remote teams Remote

- Deliver multi-tenant SaaS, fintech/payment and productivity products end to end: requirements, data model, API, UI, tests and release.
- Design PostgreSQL schemas and REST APIs on Node.js/Next.js with tenant isolation enforced in the database through Row-Level Security.
- Fixed production payment defects: an approval endpoint that intermittently returned invalid JSON and triggers that could double-apply payments.
- Fine-tuned Qwen2.5-3B-Instruct with QLoRA and served it through a FastAPI endpoint for a client's customer-support assistant.
- Ship behind automated checks: Vitest and Playwright suites in GitHub Actions CI covering access control and core business rules.

Software Engineering Trainee (Industrial Training) Sep 2023 – Nov 2023
Logicrack Infosystem Pvt. Ltd. Kolkata

- Built *Office CRM* in ASP.NET Core 6.0 MVC during a 10-week certified programme: relational schema, controllers and Razor views.

Web Development Trainee 2022
Webguru Technology — responsive interfaces, client-server fundamentals, UI component integration Kolkata

SELECTED PROJECTS

TelePoint — Fintech EMI and payment collection platform 🐙 Biswadipgoj/telepoint 🌐 telepoint-topaz.vercel.app
Next.js · TypeScript · PostgreSQL · AWS S3 · jsPDF · Recharts

- Role-based portals for customers, retailers and admins; every write verifies record ownership server-side (403 on cross-account access).
- Modelled partial payments and made payment reversal undo EMI, fine and balance effects; built PDF receipts, QR payments and analytics.

Nexora — Multi-tenant project and task management 🐙 Biswadipgoj/nexora 🌐 nexora-xi-rust.vercel.app
Next.js · TypeScript · PostgreSQL (RLS) · Electron · Capacitor · Vitest · GitHub Actions

- One codebase shipped to web, Windows (Electron) and Android (Capacitor); CI builds the Android APK.
- Row-Level Security on every data path, verified by 103 automated tests for tenant isolation, IDOR and role hierarchy.

Erpixa — Modular ERP for small and mid-sized businesses 🐙 Biswadipgoj/Erpixa 🌐 erpixa.vercel.app
React · TypeScript · Vite · PostgreSQL (RLS) · Zustand · OAuth

- Organization-scoped data enforced by Row-Level Security; onboarding switches on only the modules a business needs (9 domains).

Tripmate — Group expense splitting and settlement 🐙 Biswadipgoj/trip 🌐 tripmate.boats
Next.js · TypeScript · PostgreSQL (RLS) · Zustand

- Greedy settlement algorithm nets group balances into the fewest payments; 4 split types, UPI QR payments, PDF reports, offline mode.

NanoLink — URL shortener with protected and expiring links 🐙 Biswadipgoj/nl 🌐 nanl.vercel.app
Next.js · TypeScript · Prisma · PostgreSQL · Zod · bcrypt

- Zod-validated REST API with unique aliases, bcrypt-protected and expiring links, click tracking and one-time links.

EDUCATION

B.Tech, Computer Science & Engineering — Brainware University, Kolkata 2021 – 2024
Diploma, Computer Science & Engineering — Brainware University, Kolkata 2018 – 2021
Secondary & Higher Secondary — Uluberia High School, West Bengal Board 2011 – 2018
