

BISWADIP GOJ

Full-Stack Software Engineer & Business Analyst

Phone: +91 7003617074 | Email: biswadipgoj@gmail.com | Location: Uluberia, West Bengal, India

GitHub: Biswadipgoj | LinkedIn: biswadipgoj | Portfolio: biswodip.in

PROFESSIONAL SUMMARY

Biswadip Goj is a Full-Stack Software Engineer & Business Analyst with 60+ independently shipped products and systems. Proven track record spanning ASP.NET Core 6.0 MVC, React, Next.js, Node.js, and PostgreSQL. Combines requirements elicitation, workflow modeling, and domain schemas with deterministic REST APIs and production CI/CD delivery.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL, HTML5, CSS3

Frameworks & Runtimes: Next.js (App Router), React, Node.js, ASP.NET Core 6.0 MVC, Express

Databases & ORM: PostgreSQL, Prisma ORM, Row-Level Security (RLS), ACID Transactions, pgvector

Business Analysis & Architecture: Requirement Elicitation, Workflow Modeling, Acceptance Criteria, Domain Schemas, System Contracts

Tools & Delivery: Git, GitHub Actions, Docker, CI/CD, REST APIs, Zod, Vite, Electron, Capacitor

WORK EXPERIENCE & INDUSTRIAL TRAINING

Independent Software Engineer & Technical Consultant | Remote (2023 - Present)

- Architected and shipped **60+ software products and systems** independently across web and cross-platform targets.
- Implemented multi-tenant data isolation with PostgreSQL Row-Level Security and deterministic REST API boundaries via Zod.
- Developed custom algorithmic workflows including greedy debt-minimization graphs and role-based access controls.

Software Engineering Trainee (Industrial Training) | Logiccrack Infosystem Pvt. Ltd., Kolkata (Sep 2023 - Nov 2023)

- Completed certified 10-week industrial training on **ASP.Net Core 6.0 with MVC framework** under HR T&P Directorate.
- Engineered the **Office CRM** web application managing business workflows, customer entities, and operational data.
- Developed MVC controllers, relational data models, dependency injection services, and responsive client-side views.

Web Development Trainee (Field Training) | Webguru Technology (2022)

- Completed industrial and field training covering core web standards, client-server data flow, and modern responsive UI development.

SELECTED PROJECTS

Erpixa | React / TypeScript / PostgreSQL / Vite

Multi-tenant business management application with organization-based access and modular workflows. Membership records connect users to organizations and their roles.

Live application | Source code

NanoLink | Next.js / TypeScript / Node.js / PostgreSQL

Production-style URL management application with custom links, passwords, expiry and click tracking. The route validates the request, normalizes the URL and checks it before creating the record.

Live application | Source code

TelePoint | Next.js / TypeScript / PostgreSQL

EMI management and customer payment collection platform built from retail financial workflow analysis. The API checks the user, active retailer record and PIN before processing the request.

Live application | Source code

Nexora | Next.js / TypeScript / React / Electron / Capacitor

Cross-platform project and task management workspace running across Web, Windows desktop and Android. Next.js and React provide the application, with Electron for Windows and Capacitor for Android.

Live application | Source code

Tripmate | Next.js / React / TypeScript

Group expense management and settlement application with greedy debt resolution. The application uses member and expense information to calculate balances.

Live application | Source code

EDUCATION

B.Tech in Computer Science & Engineering | Brainware University (2021-2024)

Diploma in Computer Science & Technology | Brainware University (2018-2021)

Secondary & Higher Secondary Education | Uluberia High School, Uluberia
