PROFESSIONAL SUMMARY

Full-Stack Software Engineer / full-stack developer (B.Tech Computer Science, 2024) building production web applications with React, Next.js, Node.js, TypeScript and PostgreSQL. Owns delivery end to end: requirements, REST API and database design, secure multi-tenant access control, automated testing, CI/CD and deployment. 50+ projects shipped for client companies and remote teams, including a live fintech EMI/payment platform, a multi-tenant SaaS ERP and a fine-tuned LLM for a client support assistant.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, C#, HTML5, CSS3

Frontend: React, Next.js (App Router, Server Components), Tailwind CSS, Zustand, React Hook Form, responsive design, Electron

Backend: Node.js, REST APIs, Next.js Route Handlers, Zod validation, FastAPI, ASP.NET Core MVC, authentication and authorization

Databases: PostgreSQL, SQL, data modelling, Row-Level Security (RLS), migrations, triggers, indexing, Prisma ORM, Redis

Cloud & DevOps: Docker, Kubernetes, CI/CD, GitHub Actions, Amazon Web Services (AWS S3), Vercel, Linux, Git, GitHub

Testing & Security: Unit testing (Vitest), end-to-end testing (Playwright), role-based access control (RBAC), OAuth 2.0, multi-tenant isolation

AI / ML: Large language models (LLMs), fine-tuning (QLoRA), model serving (FastAPI), RAG, prompt engineering

CS Fundamentals: Data structures and algorithms, object-oriented programming (OOP), DBMS, operating systems, networks, system design

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

2024 – Present

Freelance / Contract — client companies, startups and remote teams

Remote

- Delivered multi-tenant SaaS, fintech/payment and productivity apps end to end: requirements, data model, REST API, React UI, tests, release.
- Designed PostgreSQL schemas and Node.js/Next.js REST APIs with tenant isolation enforced in the database through Row-Level Security.
- Fixed production payment defects: an approval API returning invalid JSON intermittently and triggers that could double-apply payments.
- Fine-tuned Qwen2.5-3B-Instruct with QLoRA and served it through a FastAPI endpoint for a client's customer-support assistant.
- Protected releases with Vitest and Playwright suites in GitHub Actions CI/CD covering access control and core business rules.

Software Engineering Trainee (Industrial Training)

Sep 2023 – Nov 2023

Logiccrack Infosystem Pvt. Ltd.

Kolkata, India

- Built *Office CRM*, a customer and workflow management app, in C# / ASP.NET Core 6.0 MVC: relational schema, controllers, Razor views.

Web Development Trainee

2022

Webguru Technology — responsive web interfaces, client-server fundamentals, UI components

Kolkata, India

PROJECTS

TelePoint — Fintech EMI and payment collection platform

🐙 github.com/Biswadipgoj/telepoint 🌐 telepoint-topaz.vercel.app

Tech: Next.js, React, TypeScript, PostgreSQL, AWS S3, jsPDF, Recharts

- Built role-based portals for customers, retailers and admins; every write verifies record ownership server-side (403 on cross-account access).
- Modelled partial payments and made reversals undo EMI, fine and balance effects; added PDF receipts, QR payments and analytics.

Nexora — Multi-tenant project and task management platform

🐙 github.com/Biswadipgoj/nexora 🌐 nexora-xi-rust.vercel.app

Tech: Next.js, React, TypeScript, PostgreSQL (RLS), Electron, Capacitor, Vitest, GitHub Actions

- Shipped one codebase to web, Windows (Electron) and Android (Capacitor), with the Android APK built in CI.
- Enforced Row-Level Security on every data path, verified by 103 automated tests for tenant isolation, IDOR and role hierarchy.

Erpixa — Modular SaaS ERP for small and mid-sized businesses

🐙 github.com/Biswadipgoj/Erpixa 🌐 erpixa.vercel.app

Tech: React, TypeScript, Vite, PostgreSQL (RLS), Zustand, OAuth 2.0

- Designed an organization-scoped data model enforced by Row-Level Security; onboarding enables only the modules needed (9 domains).

Tripmate — Group expense splitting and settlement app

🐙 github.com/Biswadipgoj/trip 🌐 tripmate.boats

Tech: Next.js, React, TypeScript, PostgreSQL (RLS), Zustand

- Greedy settlement algorithm reduces group balances to the fewest payments; 4 split types, UPI QR, PDF reports, offline mode.

NanoLink — URL shortener with protected and expiring links

🐙 github.com/Biswadipgoj/nl 🌐 nanl.vercel.app

Tech: Next.js, TypeScript, Prisma, PostgreSQL, Zod, bcrypt

- Built a Zod-validated REST API with unique aliases, bcrypt-protected and expiring links, click tracking and one-time links.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering — Brainware University, Kolkata

2021 – 2024

Diploma in Computer Science and Engineering — Brainware University, Kolkata

2018 – 2021

Secondary and Higher Secondary — Uluberia High School, West Bengal Board

2011 – 2018
