Ai & Retrieval: RAG Architecture, Vector Search, LLM Integration, Hybrid Retrieval (BM25 + Vector), LangChain, Model Evaluation

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer - Freelance & Contract Developer

Client Contracts & Multiple Companies (Remote) | 2024-Present

- Contracted across multiple client companies and startups, engineering production web applications, API integrations, and database architectures.
- Implemented distributed caching with Redis, containerized microservice deployments with Docker & Kubernetes, and deterministic Zod API boundary validation.
- Formulated multi-tenant data isolation with PostgreSQL Row-Level Security (RLS) to restrict access to organization-owned records.

Software Engineering Trainee (Industrial Training)

Logicrack Infosystem Pvt. Ltd. | Sep 2023-Nov 2023

- Completed certified 10-week industrial training on ASP.NET Core 6.0 with MVC framework under Director (HR, T&P).
- Engineered 'Office CRM' web application managing business workflows, customer relationships, and operational data.
- Implemented relational schemas, controller actions, domain models, and responsive Razor interface views.

Web Development Trainee

Webguru Technology | 2022

- Trained on modern web development standards, client-server workflows, and UI component integration.
- Developed responsive web interfaces and practiced end-to-end frontend deployment practices.

TECHNICAL PROJECTS

Erpixa

React / TypeScript / PostgreSQL / Vite

Multi-tenant business management application with organization-based access and modular workflows. Membership records connect users to organizations and their roles.

NanoLink

Next.js / TypeScript / Node.js / PostgreSQL

Production-style URL management application with custom links, passwords, expiry and click tracking. The route validates the request, normalizes the URL and checks it before creating the record.

TelePoint

Next.js / TypeScript / PostgreSQL

EMI management and customer payment collection platform built from retail financial workflow analysis. The API checks the user, active retailer record and PIN before processing the request.
